# WELCOME

## TO CURRENT ELECTRICAL CONTRACTORS

Power begins long before a light switch is flipped or a screen comes to life. It starts at the source — generated, transmitted, and transformed through an intricate network until it reaches the places where life happens: homes, schools, businesses, and communities.

Our work begins where the utility service ends — at the meter box — and extends through the main electrical panel and every wire, light, outlet, and system that keeps a space powered, safe, and functional.

Inside this company profile, you'll discover who we are, what we do, and how we serve people, homes, and businesses with care.

Whether you're a homeowner, builder, designer, partnering trade, property manager, or business owner, this guide shows how we deliver not just electricity— but complete electrical solutions for nearly all of your power needs.

CURRENT ELECTRICAL CONTRACTORS

# ABOUT US

At Current Electrical Contractors, our mission is to power homes and businesses with care.

Family-owned and serving Northeast Florida since 2008, we specialize in high-end residential and boutique commercial electrical work — combining skilled craftsmanship with honest, reliable service.

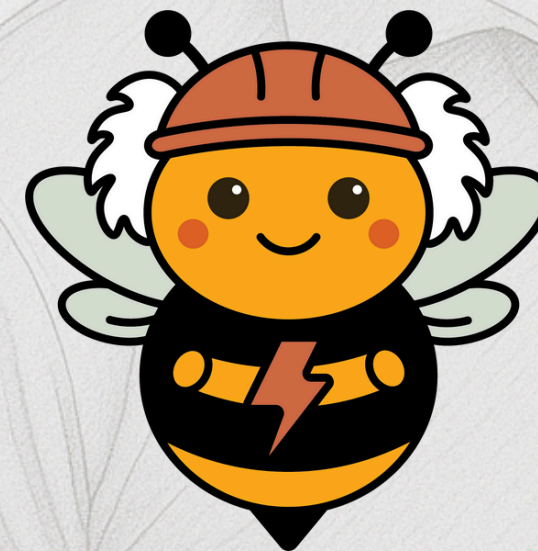

We show up on time, communicate clearly, and deliver clean, code-compliant results that stand the test of time. Our licensed and insured team brings professionalism to every project — from smart lighting and generator installs to remodels and new construction.

## **Our Promise:** Power With Care

Every project gets our full attention — because there's a difference between done and done right. Built to last and delivered with care.

## **Meet Our Mascot:** Albee Einstein

Smart, caring, and always buzzing with ideas, Albee supercharges our mission —demystifying electrical work and sharing practical guidance to help you make informed decisions and use power with confidence.

# TESTIMONIALS

**DAVID GAUTHIER**

I have a need for subcontractors as a landlord of many rental properties and for my personal home. Current Electrical always sends us, prompt professional technician's that handle our issues with skill care and diligence. Large or small jobs, the level of service never disappoints. I highly recommend them.

**CHARLIE FLETCHER**

Arrived on time, worked efficiently, cleaned up after extensive digging and returned everything to original state. Their electrical work was outstanding.

**JANE EVANS**

They communicate clearly, are on time, efficient and great people. I have done business with them for nearly 10 years and have always exceptional service. A+

**SCOTT WOLFRAM**

Professionalism, Punctuality, Quality, Responsiveness, Value. These guys really helped me out when I had a house fire. They were flexible and made it happen in the face of some adversity

**ADRIA LEIGH**

The crew is amazing! I would never hire another electrician. We have used his company for over 20 years. For years they did repairs/replacements in our home in Mandarin. When we bought a different house 7 years ago, they replaced all of the outdated lighting. Their skills are off the charts. Their pricing is fair. They are responsive with their scheduling. They're great at trouble shooting and talking/working through a difficult situation. I can't recommend them more highly.

# ELECTRICAL SOLUTIONS *FOR HOMEOWNERS*

We deliver comprehensive electrical solutions for homeowners — from lighting and smart panels to EV chargers, generators, and surge protection. Our certified team provides safe, reliable installations and upgrades for every area of your home, indoors and out, enhancing comfort, efficiency, and security.

With expert craftsmanship and modern technology, we make homes brighter, smarter, and ready for the future.

## Popular Home Projects

Our most requested home electrical projects, installed safely, on schedule, and with clean finishes.

### OUTDOOR KITCHENS

Power for grills, refrigerators, ice makers, and lighting — all exterior-rated and safely grounded.

### LIGHTING & COMFORT

Upgrade your home's comfort with new lighting, ceiling fans, and outlets for a safer, more convenient, and stylish space.

### STORM READINESS

Stay powered and protected during outages with whole-house generators, generator inlet boxes, and surge protectors.

### PANEL REPLACEMENT

Replace outdated panels with reliable solutions that keep your home safe and support growing electrical demands.

### EV CHARGERS

Safe, convenient home charging for your electric vehicle with professional installation.

1.

## Safety & Peace of Mind

Electrical protection and reliability for your family and home.

### MONITORING SYSTEMS

Stay informed when critical systems — such as sump pumps, freezers, security systems, or HVAC — lose power, helping you prevent damage and spoilage during outages.

### CHILD PROOFING

From tamper-resistant outlets to child-friendly lighting and hidden wiring, we make your home safer for little explorers — so kids can move, play, and grow without worry.

### ELECTRICAL UP TO CODE

Bring aging electrical systems up to modern safety standards and prevent overloads or hazards with expert panel replacements and rewiring.

### STORM READINESS

Stay powered and protected during outages with whole-house generators, generator inlet boxes, and surge protectors.

### SURGE PROTECTION

Whole-home surge protection that shields appliances and electronics from costly damage.

2.

Smart & Efficient Living

Power systems that save energy, add convenience, and prepare your home for the future.

ENERGY MONITORING

Track your home’s energy use to see where your money goes and find ways to save.

SMART CONTROLS

Intuitive lighting control with dimmers, sensors, and app integration for modern convenience.

SMART PANELS & TECH

Upgrade to smart panels that monitor energy use, support high-performance EV chargers, and simplify power management.

EFFICIENT LIGHTING

LED retrofits and smart lighting that lower bills and enhance ambiance.

3.

## Kitchen & Bath Comfort

From practical to luxury power and lighting for the spaces you use most.

### HEATED TOWEL RACK

Power and installation for towel warmers and radiant heat accessories.

### LIGHTED MIRRORS

Expert installation and power for illuminated, fog-free mirrors — safe, functional, and beautifully done.

### POWER FOR APPLIANCES

Dedicated, properly sized circuits for all major kitchen equipment — range, oven, microwave, dishwasher, disposal, refrigerator, wine coolers or beverage centers.

### POWER OUTLETS

Functional, GFCI/AFCI-protected circuits where it's needed — countertops, islands, peninsulas, and concealed locations.

### TASK, AMBIENT & ACCENT LIGHTING

Layered lighting — recessed, under-cabinet, and feature fixtures — for balanced illumination.

4.

## Outdoor & Landscape Power

Beautiful, safe, and reliable power for outdoor living.

### OUTDOOR KITCHENS

Power for grills, refrigerators, ice makers, and lighting — all exterior-rated and safely grounded.

### MOTORIZED GATES

Reliable, weather-protected power for gates and control systems.

### RV HOOKUPS

Code-compliant 30A or 50A power connections for recreational vehicles.

### LANDSCAPE LIGHTING

Pathway, accent, and tree lighting that enhances curb appeal and safety. Plan-ahead receptacles for holiday lighting and decorations.

### OUTDOOR WATER SYSTEMS

Dedicated, weather-rated, GFCI-protected circuits for pools, spas, fountains, wells, and irrigation pumps — ensuring safe and reliable power for all water-related equipment.

5.

## Owner-Builder Renovations

Expert support for homeowners managing their own projects.

### KITCHEN & BATH REMODELS

Wiring, outlets, and lighting installed to make your new kitchen or bathroom both beautiful and functional.

### OUTDOOR KITCHENS

Power for grills, refrigerators, ice makers, and lighting — all exterior-rated and safely grounded.

### SHEDS & WORKSHOPS

Dedicated sub-feeds or branch circuits for accessory structures and outdoor workspaces.

### SERVICE UPGRADE

Need more power for new appliances or an expanding living space? We upgrade your electrical panel and wiring to safely power your home's next generation of needs with confidence.

### NEW CONSTRUCTION

Complete electrical systems for new homes, additions, or expansions — designed to be safe and future-ready.

6.

## Troubleshooting & Repair

Inspections and repairs when something goes wrong.

### SAFETY & GFCI ISSUES

GFCIs that trip or fail, shocks near water, or corrosion in panels are serious safety concerns. We test, repair, and ground your system to keep your family protected.

### MOISTURE & WEATHER DAMAGE

Moisture, salt air, and humidity can corrode outdoor equipment and trip GFCIs. We find the problem fast and keep your system protected from the elements.

### STORM & LIGHTNING DAMAGE

Power surges can silently damage pumps, lights, and controls. We inspect, repair, and assess surge-affected wiring and equipment to get your system back online safely.

### LIGHTING ISSUES

Dimming, flickering, or non-working lights? We repair indoor and outdoor lighting to restore safety, ambiance, and comfort.

### POWER OR BREAKER PROBLEMS

Frequent tripping breakers or dead outlets? We diagnose and repair overloaded circuits, loose connections, and failing breakers to restore safe, consistent power.

# ELECTRICAL SOLUTIONS

***FOR BUILDERS & DESIGNERS***

We work seamlessly with custom builders and designers from rough-in to final trim, delivering precise, code-compliant electrical systems that integrate flawlessly with other trades and align with project timelines and design intent.

From new power and backup power installations to smart systems and comfort upgrades, we bring reliability, craftsmanship, and on-time execution to every build.

1.

# Kitchen Remodels

Functional and appealing electrical solutions for modern kitchens installed with precision to fit your design intent.

## POWER FOR APPLIANCES

Dedicated, properly sized circuits for all major kitchen equipment — range, oven, microwave, dishwasher, disposal, refrigerator, wine coolers or beverage centers.

## TASK, AMBIENT & ACCENT LIGHTING

Installation of layered lighting — recessed, under-cabinet, accent, and feature fixtures — positioned for balanced illumination and aligned with your layout.

## POWER OUTLETS

Functional, code-compliant GFCI/AFCI-protected circuits where it's needed — countertops, islands, peninsulas, and concealed locations. Standard or USB/USB-C options.

## SMART TECHNOLOGY

Smart switches, dimmers, and connected lighting for comfort, efficiency, and convenience — integrated with modern appliances and compatible with home automation systems.

2.

Bathroom Remodels

Comprehensive electrical solutions for modern bathrooms installed cleanly and professionally.

LUXURY COMFORTS

Power for lighted & defogging mirrors, heated towel racks, radiant heat accessories, and other luxury comforts.

STEAM SHOWER & SPA

Safe, properly rated circuits for steam showers and in-home spa systems.

POWERED BIDETS

Dedicated circuits for smart or heated bidet seats — coordinated with the plumbing layout.

POWER OUTLETS

GFCI/AFCI-protected outlets placed for convenience and safety — vanities, built-ins, and concealed power for styling tools or accessories.

VANITY, SHOWER & AMBIENT LIGHTING

Layered lighting for vanities, showers, and ambient zones — recessed, wall-mounted, and accent fixtures installed to bring your design to life.

3.

## Landscape & Outdoor Spaces

Outdoor electrical systems designed for beauty, safety, and performance.

### MOTORIZED GATES

Reliable, weather-protected power for gates and control systems.

### RV HOOKUPS

Code-compliant 30A or 50A power connections for recreational vehicles.

### LANDSCAPE LIGHTING

Pathway, accent, and tree lighting that enhances curb appeal and safety. Plan-ahead receptacles for holiday lighting and decorations.

### OUTDOOR KITCHENS

Power for grills, refrigerators, ice makers, and lighting — all exterior-rated and safely grounded.

### OUTDOOR WATER SYSTEMS

Dedicated, weather-rated, GFCI-protected circuits for pools, spas, fountains, wells, and irrigation pumps — ensuring safe and reliable power for all water-related equipment.

4.

## New Construction

Full-service electrical systems for new homes and additions — built to current code and ready for the future.

### CONSTRUCTION POWER & LIGHTING

Safe, reliable temporary power and early lighting setups to keep construction sites running smoothly and minimize downtime.

### NEW SERVICE & ELECTRICAL PANELS

Coordination with the utility company for meter and service cable installations. Grounding and new electrical panel setup.

### LIGHTING, COMFORT & POWER

Beautiful lighting, custom finishes, and dedicated power for your HVAC and appliances — everything you need for a safe, comfortable, and polished home.

### LANDSCAPE & EXTERIOR

Power and lighting solutions for outdoor living spaces, coordinated with hardscaping and exterior finishes.

### SMART & READY SYSTEMS

From smart panels and home automation to EV chargers and backup power — expertly installed for a safer, more connected home ready for the future.

5.

# Whole-Home Renovations

Full-service electrical systems for large-scale remodels — built to current code and ready for the future.

## WHOLE-HOME REWIRE

Replace outdated, fire-hazard cloth or aluminum wiring with modern, code-compliant copper for a safer, more reliable electrical system throughout your home.

## SERVICE UPGRADE

Need more power for new appliances or an expanding living space? We upgrade electrical panels and wiring to safely support modern power requirements with confidence.

## LIGHTING, COMFORT & POWER

Beautiful lighting, custom finishes, and dedicated power for HVAC and appliances — everything you need for a safe, comfortable, and polished home.

## LANDSCAPE & EXTERIOR

Power and lighting solutions for outdoor living spaces, coordinated with hardscaping and exterior finishes.

## SMART & READY SYSTEMS

From smart panels and home automation to EV chargers and backup power — expertly installed for a safer, more connected home ready for the future.

Plumbing

2.

HVAC

# ELECTRICAL SOLUTIONS

## ***FOR PARTNERING TRADES***

We partner with plumbing and HVAC professionals to provide reliable, code-compliant electrical systems that keep critical equipment running safely and efficiently.

From powering tankless water heaters to HVAC units, we coordinate seamlessly with your team to ensure power is ready when you are. Our team helps your installations perform flawlessly and keep projects on track.

1.

## Plumbing

Reliable power for everything from smart bidets and tankless water heaters to sump pumps and lift stations.

### TANKLESS WATER HEATERS

We deliver power for tankless water heaters — from outlets for gas units to properly sized dedicated circuits for electric models — keeping your installs running safely and reliably.

### POWERED BIDETS

From heated seats to full-featured smart bidets, we provide safe, code-compliant power at the right location — with dedicated circuits when required.

### SUMP PUMP ALARM LOSS-OF-POWER

For added protection, we offer battery-powered alarms that notify homeowners when sump pump power is lost — helping prevent backups and water damage during outages.

### SUMP PUMPS

We provide dependable, dedicated, GFCI-protected power for sump pumps used in septic systems to ensure continuous and safe wastewater management.

### SMART LEAK DETECTION

We install exterior-rated outlets for water leak detection systems — keeping sensors powered, reliable, and ready to protect homeowners from costly water damage.

2.

## HVAC

Reliable power to keep your heating, cooling, and ventilation equipment running safely and efficiently.

### AIR HANDLERS

We provide dedicated circuits to ensure air handlers run efficiently and safely without overloading existing wiring.

### DEHUMIDIFIERS

We supply safe, dedicated circuits to keep whole-home dehumidifiers running smoothly and dependably.

### MINI-SPLIT

Ideal for additions, garages, or rooms that don't cool evenly, mini-splits need their own dedicated power. We wire and protect each unit for optimal efficiency and quiet operation.

### KITCHEN & BATH VENTILATION

Electrical connections for bathroom fans and kitchen range hoods — coordinated with HVAC partners for safe, code-compliant installation.

### CONDENSERS

We install properly sized, weather-rated power connections for outdoor condensers to prevent voltage drops, tripped breakers, and premature equipment wear.

# ELECTRICAL SOLUTIONS

## ***FOR PROPERTY MANAGERS***

Trusted by property managers, landlords, home inspectors, and real estate professionals, we deliver electrical work that reflects your commitment to quality and exceptional service.

From inspections to upgrades that add value, our team works with precision and professionalism to protect your investment, reduce downtime, and enhance tenant satisfaction — making property management easier.

1.

## Reliable Service for Properties

From condos to single-family and multi-unit homes, we provide professional service that keeps properties ready.

### SAFETY & GFCI ISSUES

GFCIs that trip or fail, shocks near water, or corrosion in panels are serious safety concerns. We test, repair, and ground your system to keep your family protected.

### MOISTURE & WEATHER DAMAGE

Moisture, salt air, and humidity can corrode outdoor wiring and trip GFCIs. We find the problem fast and keep your system protected from the elements.

### STORM & LIGHTNING DAMAGE

Power surges can silently damage pumps, lights, and controls. We inspect, repair, and assess surge-affected wiring and equipment to get your system back online safely.

### LIGHTING ISSUES

Dimming, flickering, or non-working lights? We repair indoor and outdoor lighting to restore safety, ambiance, and comfort.

### POWER OR BREAKER PROBLEMS

Frequent tripping breakers or dead outlets? We diagnose and repair overloaded circuits, loose connections, and failing breakers to restore safe, consistent power.

2.

Safety & Compliance

Electrical reliability that protects your investment and keeps you insurance-compliant and inspection-ready.

ELECTRICAL  
UP TO CODE

Remedy outdated wiring, ungrounded outlets, and other violations to meet local electrical and insurance requirements.

PANEL  
REPLACEMENT

Replace outdated panels with reliable solutions that keep your properties safe and support growing electrical demands.

POWER SURGE  
PROTECTION

Whole-property surge protection that prevents appliance or HVAC damage from spikes and storms.

POWER LOSS  
MONITORING

Receive alerts when essential systems — such as pumps, HVAC units, or security systems — lose power, protecting tenants and assets.

3.

Upgrades That Add Value

Modern upgrades that make your properties more efficient, appealing, and competitive in the rental market.

LUXURY BATH APPEAL

Power and installation for mirrors with integrated lighting and heating, and heated towel racks.

BACKUP POWER

Keep critical systems (like elevators, gates, and emergency lighting) operational during outages.

EV CHARGER

Attract high-value tenants with dedicated EV charging stations — safely installed, labeled, and metered as needed.

SMART PANELS & CONTROLS

Upgrade to smart panels that monitor energy use and enhance your property's comfort and style with intuitive lighting control — including dimmers, motion sensors, and automation.

LED & LIGHTING UPGRADES

Energy-efficient lighting for hallways, parking areas, and shared spaces — reducing operating costs and improving safety.

4.

## Outdoor & Community Spaces

Weather-rated power and lighting that boost curb appeal, tenant safety, and property value.

### MOTORIZED GATES

Reliable, weather-protected power for gates and control systems.

### RV HOOKUPS

Code-compliant 30A or 50A power connections for recreational vehicles.

### LANDSCAPE LIGHTING

Beautiful lighting that enhances safety, ambiance, and curb appeal — illuminating pathways, community signs, entry monuments, and address markers.

### OUTDOOR KITCHENS

Power for grills, refrigerators, ice makers, and lighting — all exterior-rated and safely grounded.

### OUTDOOR WATER SYSTEMS

Dedicated, weather-rated, GFCI-protected circuits for pools, spas, fountains, wells, and irrigation pumps — ensuring safe and reliable power for all water-related equipment.

# ELECTRICAL SOLUTIONS

## ***FOR LOCAL BUSINESSES***

We power our local business community with reliable electrical solutions that keep operations running smoothly and safely.

From restaurants and retail spaces to offices and workshops, our team delivers expert installations and upgrades — including lighting, equipment power, and service expansions — all designed to keep your doors open, your operations efficient, and your business ready for growth.

1.

# Interior & Storefront Lighting

Enhance visibility and ambiance with layered, efficient lighting designs that create inviting customer experiences.

## HOSPITALITY LIGHTING

Create the right mood with warm, dimmable lighting that enhances ambiance and complements your interior design.

## RETAIL LIGHTING

Display, accent, and decorative lighting that makes your merchandise stand out.

## WORKSPACE LIGHTING

Install balanced, energy-efficient lighting that improves focus, reduces eye strain, and keeps your workspace comfortable and productive.

## STOREFRONT & SIGN LIGHTING

Make your business stand out day or night with clean, reliable lighting for signage, entryways, and exterior displays that attract customers and boost curb appeal.

## BEAUTY LIGHTING

Enhance the client experience with flattering, natural lighting for salons, spas, and barbershops — making every service look and feel its best.

2.

## Power for Equipment

Reliable, properly-sized power for business equipment to ensure continuous, safe, and reliable operation.

### RETAIL SYSTEMS

Clean, dependable power for computers, registers, and displays — keeping your storefront running smoothly without interruptions.

### COMMERCIAL KITCHENS

Dedicated power for ovens, mixers, fryers, refrigeration, and dishwashing systems — designed to handle heavy daily use and prevent overloads during peak hours.

### WORKSHOPS

Reliable power for saws, sanders, dust collectors, and CNC tools — all properly grounded and protected to meet shop safety standards.

### MANUFACTURING

Circuits and outlets rated for welders, air compressors, and machinery to keep your production line running safely and efficiently.

3.

### Smart & Automated Controls

Timers, occupancy sensors, and smart lighting systems that save energy and simplify management.

#### OCCUPANCY & MOTION SENSORS

Hands-free lighting that turns on when you enter and off when you leave — improving convenience and energy efficiency in restrooms, offices, and hallways.

#### SMART LIGHTING SCENES

Program lighting zones and dimming levels for different times of day or activities, controllable from a switch, phone, or voice command.

#### REMOTE MONITORING

Manage lights, HVAC, and security devices from anywhere with app-based scheduling and real-time alerts for full control and peace of mind.

#### SMART PANELS

Upgrade to smart panels that monitor energy use and simplify power management.

4.

## Panel & Service Upgrades

Replace outdated panels and add capacity for expanded equipment or future growth.

### INCREASED POWER DEMANDS

Support new equipment or commercial kitchen expansion with upgraded panels and properly sized circuits to prevent overloads and downtime.

### OUTDATED OR UNSAFE PANELS

Replace outdated panels with reliable solutions that protect your business and support growing electrical demands.

### NEW TENANT BUILD-OUTS

Reconfigure power distribution for retail, restaurant, or office tenant spaces.

### SURGE PROTECTION

Surge protection that shields appliances, equipment, and electronics from costly damage.

# OUR PROCESS

1.

## LISTEN & ASSESS

We start by understanding your goals, reviewing plans, and assessing site conditions — so our team can identify potential challenges early and design solutions that fit your exact needs.

2.

## SOLUTION & QUOTE

We provide transparent pricing and honest recommendations—focused on what you need now, with careful consideration for long-term savings and peace of mind. Fixed quotes when possible, time-and-material billing when flexibility is needed.

3.

## PLAN & EXECUTE

Once approved, we schedule and complete the work efficiently—coordinating seamlessly with other trades and working with utilities for service connections or the city for inspections.

4.

## WARRANTY & GUARANTEE

After completion, we review the work with you, verify operation, and stand behind it with our one-year workmanship warranty and satisfaction guarantee. We're not done until it's done right and you're happy.

CURRENT ELECTRICAL CONTRACTORS

# WE ARE THE KEEPERS

## Listen closely.

Beneath every light, every screen, every heartbeat of a city— there's a hum.  
That hum is **electricity**.

The pulse of modern life, connecting us all.

The hive we belong to is powered by this energy.

The nectar of the hive feeds everyone.

But not all nectar is the same— just as not all lives are the same.

For a family, electricity means safety and comfort at home.

For a builder, it's about honoring the craft and upholding a reputation.

For a business, it's reliability that keeps doors open and communities thriving.

In this hive, **we are the keepers**.

We deliver the nectar of current— for people, homes, and businesses.

Always with care.

Because those who know, know there's a difference between done—  
and done right.

*Power with Care.*
